Mmm fingers 2 apk download

Mmm Fingers 2 is a play produced and released by Noodlecake Studios on 19 October 2017. Extremely fun game easy to play with smooth touch management on Android, iOS; Touch and destroy monsters that will keep your fingers can't stop. Mmm Fingers 2 is the perfect game to entertain for hours or kill time. Download Mmm Fingers 2 Mod APK (Unlimited Coins/Diamond) the latest for Android Game has simple graphics, but the colors are very fresh, eye-appealing and attractive. Monsters are created in different forms and are accompanied by terms that look very strange and funny. Looking at it, we also find that they are always waiting to hit the players with their fingers. The content and how to play is simply that the player has to hold his finger on the screen and move constantly so that not all monsters are being put into the player. Players need to avoid monsters as much as possible and they will have mark points. The player loses and will have to play again if they get bites or pulls his hand out of the screen. There is also a social network feature to share your score, as well as an update to the highest scorecard in the world. The obstacles in this game are monsters with shells and mills that rotate with sharp nails. Of course, if you don't care and touch them, the screen appearance will inform you that the game is finished. Players also have adjustments in the upper left corner of the screen menu, such as background music on/off, mute/unmute or change blood color. The statistics button records player achievements, such as today's record, session record, highest score, total score in all matches, total number of games. Above is a table of results of the last 12 games played. The graphics in Mmm Fingers 2 is relatively impressive with graphics not too distinct and more details, but sharp. The sound is pretty low, so it's easy to lose focus. It's probably also a factor the publisher wants to make the game harder then. The game also includes social sharing on social media, as well as high ratings in the world. Although I'm very experienced in the original mmm fingers, getting past 1000 score every run, I can't even pass 500 in this game. Music is bad, too, and the game is generally not fun. I also have an iPhone XR and when I ever try to leave the application, it plays the game and gives me an automatic score 0 just because I lowered my hand to suppress it up. My average is literally 50. There are a lot too many ads when I play about 2 games I get a long 15-30 second ad, and I bet other people can't stand that like me. Me.
